WORK EXPERIENCE

IPSOS MMA

Senior Software Engineer

05/2025

- Engineered scalable full-stack features using React.js and .NET Core, improving application performance and maintainability.
- Designed reusable UI components with React Hooks and Context API, reducing code redundancy by 30%.
- Deployed and managed cloud-based applications on AWS, ensuring high availability and scalability.
- Optimized store management system performance through efficient state handling and backend improvements.
- Led frontend development initiatives, enhancing UI responsiveness and overall user experience.
- Mentored junior developers and collaborated with cross-functional teams in Agile environments to deliver high-quality releases.

Software Engineer

10/2021 - 05/2025

- Engineered a scalable full-stack analytics dashboard using React.js, Node.js, and PostgreSQL, enabling data-driven decision-making.
- Implemented client-side routing with React Router, improving navigation performance and user experience.
- Optimized application performance through lazy loading and reducing load time and enhancing responsiveness.
- Built reusable components using React Hooks and managed complex state with Redux, ensuring scalable and maintainable architecture.
- Developed a dynamic "Add New Client" feature, eliminating manual database operations and efficiency.
- Automated release workflows with a dynamic release notes system; delivered a production-grade dashboard used by 361+ users.

SKILLS

- **Frontend:** React.js, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap.
- **Backend & Runtime:** Node.js, Express.js, .NET Core, .Net Framework, C#.
- **Databases:** SQL, Microsoft SQL Server, MongoDB, PostgreSQL.
- **Tools & Platforms:** GitHub, AWS, JIRA, SourceTree, Agile Methodology.

PROJECTS

Real-time Chatbot [!\[\]\(3342c215b2a8b663596a81468d5dc314_img.jpg\)](#)

11/2024

- Implemented WebSocket Communication using Socket.IO for real-time message delivery.
- Designed a Responsive UI with React.js and CSS.
- Integrated MongoDB as a NoSQL Database for efficient storage.

Typing Test Application TypeFlow [!\[\]\(19d44b37fb4fa155bf9d60c77a3d3cb2_img.jpg\)](#)

09/2025

- Full-stack MERN application to measure typing speed, accuracy, mistakes, and real-time progress.
- Tech stack (React, Node, MongoDB, JWT, Tailwind, Charts).
- Core features (authentication, saving results, visualization, performance tracking).
- Impact (helps users track improvement, interactive UI).

Execution Engine FlowChart App [!\[\]\(23a2e9ddc7bb0ef55393d38b772a848d_img.jpg\)](#)

04/2026

- Engineered a dynamic runner that supports async/await and live fetch calls within custom nodes.
- This helps automate complex tasks for creating, reading, updating, and deleting information.
- Live status tracking with an automated state system to visualize execution flow success/error states.

EDUCATION

Techno India College Banipur

Bachelor of Technology in ECE

08/2016 - 05/2020
